Project Design Phase-I - Solution Fit Template

Project Title: Plasma Donor Application Team ID: PNT2022TMID30734

1. CUSTOMER SEGMENT(S)

Who is your customer?

People who are seeking for the plasma donors (Recipients) and people who wish to donate their plasma (Donors) are our customers.

Users of age between 18 and 65

2. JOBS TO BE DONE PROBLEMS

Which jobs-to-be-done (or problems) do youaddress? for your customers?

Finding the respective blood group donors at the right time Finding the locomotive service at the time of emergency. The customer will be able to get the donor details and availability upon immediate request without any delays -CHATBOTS

6. CUSTOMER CONSTRAINTS

What constraints prevent your customers from taking action or limit their choices of solutions?

Network Availability Availability of devices Lack of information Donor medical history Shortage of plasma

9. PROBLEM ROOT CAUSE

What is the real reason that this problem exists? What is the back storybehind the need to do this job?

People who need blood are increasing day by day. Peoplewho have diseases like anemia or people who have gotteninto accidents and run out of blood needconstant supply ofblood to sustain their life and there is not enough blood available for them. It is not that people do not want todonate blood.

5.AVAILABLE

Which solutions are available to the customers when they face the problem? or need to get the job done? What have they tried in the past? What pros & cons do these solutions have?

Contact the donors manually
Approaching various plasmadonation
camps/centers. Existing applications only give
the information about the donor and recipients
these methods consume more time and manual
work.

7.BEHAVIOUR

What does your customer do to address the problem get the jobdone?

The customer will go upto an hospital for donating the blood / Need of blood for the surgery but surgery but now they can use our application to do it documentation work can be completed via online portal and dates for the transfer can be booked. if thedonor is not sure of the consequences they can consult the doctors in the nearby hospitals which will be suggested in the website.

3. TRIGGERS

What triggers customers to act?

In order to find the donors quickly within thetime limit can make the user to use our application. In case of emergencies. Ease of access and requirement of blood type

10. YOUR SOLUTION

The main objective of this project is to provide the recipient with a donor who is in good form with no health ailments to donate blood of the corresponding blood group. This project provides quick access to donors for an immediate requirement of blood. In case of an emergency/surgery, blood procurement is always a major problem which consumes a lot of time. This helps serve the major time-lapse in which a life can be saved! The users can choose to obtain a home sample collection as well. We have chatbots to answer all queries of

the donors or users and make sure they are comfortable with the process.

The page is transparent about all the tieups with other organisations.

E-certificates will be provided for their good deed of plasma donation The user can send a request for a blood group in need or donate plasma. It contains details regarding plasma donation camps, including information about the location of the events

4. EMOTIONS: BEFORE / AFTER

How do customers feel when they face a problem or a iob and afterwards?

Customers were confused, emotionally and mentally in a worse condition before find the donor but after using the application they will able to save who are in need and their mental condition will become stable after they find the donor not able to find nearest donors available

8. CHANNELS of BEHAVIOUR

ONLINE

The customer needs to register themselves in the application and then do all the documentation and verification work. Finding donors through social media willconsume more time

OFFLINE

Physical need to go and donate the blood and do the manual process which can't be avoided. In OFFLINE, it will be difficult to find the donors at the time of emergency.
